E-DISTRIBUTION

SMARTER DISTRIBUTION | COMPLETE SOLUTIONS

Industrial Doors

Freezer, cooler, temperature control, air quality, clean room, noise reduction, safety, efficiency… whatever the reason, we've got your door. **E-Distribution is a full-service distributor, installer, and service provider**, offering a broad selection of top-quality manufactured industrial and personnel doors to meet your needs. Our trained installers and dedicated service staff ensure your doors always operate to peak performance.

Properly spec'd, quality industrial doors are money savers and one of the simplest ways to control energy use, improve safety and even increase productivity. The E-Distribution team will evaluate your operation to identify the right door for your specific needs to maximize your savings potential and ROI.

Quality Industrial Door Advantages

- Increase productivity
- Control energy use
- Lower overall operating expenses
- Increase overall warehouse safety & security
- Neutralize weather factors
- Impressive visual impact
- Noise reducing
- High-performing, low maintenance

E-Distribution
High Performance Doors

- High Speed Doors
- Dock Doors
- Standard Overhead Doors
- Personnel Doors
- Full-Service Install & Maintenance

High-Speed Insulated Doors

High-speed insulated doors are designed to contain refrigeration loss and maintain temperature control in cooled environments. Easy to operate from standard pull cord, floor-wire activation, or over-door sensor activation, extreme high-speed doors enhance traffic flow from room to room or room to dock.

Standard Temperature High-Speed Doors

Standard temperature doors provide separation between rooms where necessary and can be used for wind pressure control. Super-high-speed door products allow for easy forklift movement from room to room minimizing energy loss and air movement. Weather resistant doors are available to accommodate large vehicle traffic at the dock for loading and unloading efficiencies.

Personnel Doors

Personnel or "man doors" are available in all shapes and sizes with a wide variety of coating options including: chemical resistance, stainless steel, standard hollow core or metal doors. Doors are aesthetically pleasing yet also help your business meet security standards and eco-friendly goals.

Professional Install & Maintenance

All E-Distribution industrial and personnel doors are installed by factory trained and certified E-Distribution field service technicians who have expertise in preventive maintenance, service and new equipment installation including parts for all types of doors.

Call E-Distribution today to receive a customized door package for your new construction project or facility renovation. Or contact our maintenance team to ensure your doors are operating at full optimization.
